DELANY PRODUCTS, P.O. BOX 411
CHARLOTTESVILLE, VIRGINIA 22902 U.S.A. (434) 296-0166

FROM: Peter Delany

NUMBER: 2-10

TO: ALL Representatives

DATE: 7/15/10

SUBJECT: *New Labeling for our Flush Valve Covers*

Starting with shipments this July 2010, Delany Products we will no longer be using old fashioned stamped covers. Instead from this month, the company has changed to a new LASER etching process for the labeling of ALL of its flush valve covers,

For example our valve covers will now have the following etched into each cover:

- *DELANY PRODUCTS USA FLUSHBOY*
- *DELANY PRODUCTS USA REX*
- *DELANY PRODUCTS USA PRESTO.*

You will note that the company will no longer be indicating the valve's Gallons per Flush ("GPF") as part of the etched writing on the top of the cover. To meet this requirement, a small permanent label will be adhered to each valve. This label will be placed under the inlet on the valve body and will indicate the valve's GPF and as well as something new for Delany, the Liters per Flush ("LPF"). It will indicate whether the valve is a Water Closet and a Urinal flush valve. Finally, the label/sticker will also list the month and year that the valve was made, which is also new information for the company to provide.

In the case where a customer has purchased just the cover alone as a replacement part, the sticker with the appropriate "GPF" and "LPF" information will appear on the inside of the cover.

This is only part of our changing for the better. We are excited because we feel the etched writing gives the cover a cleaner, more distinctive and updated look. The new labeling also makes it very easy to tell a water closet flush valve from a urinal flush valve, as well as making it easy to determine both the discharge and age of the valve.

If you have any questions, please do not hesitate to contact us.
