

Capability Statement

Company Overview

Delany Products is a family owned and operated flush valve manufacturer, established in 1879. Delany's products are engineered with distinct differences and advantages to be durable, easy to maintain and most importantly cost effective, while also saving water for the facility owner. Our products are installed in restrooms of many government buildings from the DOD (such as military bases) to Veterans Administration (VA) Hospitals.

*Note: All products are 100% compatible existing competitor's control stops
Allowing for easy substitution.*

CORE COMPETENCIES

- Manual exposed flush valves
- Concealed: manual & hydraulic (used in prison/security applications)
- Bedpan Diverter valves (used in hospital applications)
- Touch-free flush valves
- Touch-free faucets
- Touch-free retrofits for manual valves (both Delany and competitors)
- 100% Operational quality control check
- Patented product(s)

Differentiators

Our products are not a copy of any competitor. They provide unique features and benefits that we call the Delany Differences. These Differences allow the owner of the building to save time, save money and save water. They also help with a major plumbing problem known as water hammer.

- TruStop, a patented control stop, that ends the hassle and time consuming need to turn the water off to the room to service the control stop. It also ends the need for setting up a HEPA Containment Tent.
- Mashaerator Diaphragm is proprietary designed self-cleaning diaphragm that prevents valves from clogging, saving time and money in repairs.
- Replaceable Main Valve Seat allows the supply lines to the valve to be 100% cleaned and free of debris.
- Regulation Screw allows for field adjustability when problems occur, saving time, money and water.
- Leak free Rubberflex Handle
- Proven ability to eliminate water hammer.

Past Performance

With 140+ years of history, Delany's products have been installed and are still in use in many government buildings. We traditionally have sold projects to the Gov't through a wholesale distributor. We are looking to eliminate the middle man to supply directly at the best price.

- Camp Pendleton, CA (US Marine Corp.)
- Camp LeJeune, NC (US Marine Corp.)
- Bancroft Hall, Annapolis (US Naval Academy)
- Puget Sound Veterans Administration Hospital, Seattle, WA
- Federal Correctional Complex, Florence, CO
- Camp Cooke Disciplinary Barracks, CA (U.S. Army)

Company Data

DUNS #: 046992343
EIN: 11-0653670
