

The second in a series of testimonials about
Delany Products' TruStop Control Stop

A Testimonial from a Professional Sports Arena Plumbing Foreman

I am the Plumbing Foreman for a professional football team in Philadelphia. I have been running the stadium for the past 25 years. I began using Delany's TruStop roughly two years ago.

The biggest bonus of the TruStop for me is that most of our bathrooms have a 6" supply valve. We have up to 40+ Flushometers in many bathrooms and the standard Control Stops don't always work. Often to fix one Stop, it means shutting off 6" gate valve and that is not a guarantee.

The ball valve design is the longest lasting valve type in my experience. I like the ease of turning it off with a water key and not dealing with a screwdriver stop.
