

The first in a series of testimonials about Delany Products' TruStop Control Stop

A LETTER FROM THE LEAD PLUMBER AT ATRIUM HEALTH CABARRUS HOSPITAL.

Dear Scott,

What a game changer the TruStop is. I'm the lead plumber at Atrium Cabarrus, where we have buildings ranging from the 1930's to new builds. Many have existing old valves and even older piping still in use.

The TruStop takes away from shutting down raisers or mains to replace the guts in a leaking stop. The quarter turn operation of the ball valve is brilliant and the body is well made.

I am completely satisfied with the Delany products that have been installed at our hospital and I plan on using them for a long time.

Kind regards,
Adam Kendrick
